PROFILE

I am a passionate undergraduate BSc (Honours) student in IT at Sri Jayawardenepura University with a strong interest in Software Engineering. I have completed the DiTEC course at ESOF Metro Campus, enhancing my understanding of software and web development. Additionally, I have also pursued a course in HRM.

MY PROJECTS

Grocery Cart

Effortlessly manage your grocery shopping with our cart system, equipped with CRUD functionality for seamless updates and organization.

MERN | Bootstrap | [click](#)

E-Commerce Website

A responsive website with functions including sign-up, login, updating account details, browsing items, managing the shopping cart, viewing order history, accessing order details, and more.

MERN | [click](#)

Customer Data Collecting System

A application uses Python with Tkinter for the GUI, openpyxl for handling Excel files, pathlib for file path manipulation, and time for time-related functions, providing a customer information system for a grocery shop.

Python| Pathlib | Excel | [click](#)

Japura C2 Leo Club Website - (ongoing)

The project aims to create a dynamic website showcasing a club's details, including information about its projects, board members, and contact details. It will provide an interactive platform for users to explore and engage with the club's activities and members.

HTML | CSS | JavaScript | [click](#)

Billing System

A desktop billing system application is created using Python's Tkinter for GUI, alongside Python modules for file handling, random number generation, and email sending.
